

Hashim Hameem

Full-Stack Developer & Mobile App Specialist

I build production mobile apps, SaaS dashboards, and developer tools with Flutter, Next.js, Supabase, Firebase, Stripe, and security analysis. My recent work spans property management, invoices, library access systems, Islamic learning apps, open-source Flutter packages, and vulnerability research.

CORE STACK

Mobile

Flutter, Dart, Riverpod, Provider, Material Design 3

Web

Next.js, React, TypeScript, Tailwind CSS, Vite

Backend

Supabase, Firebase, Node.js, MongoDB, SQLite, REST APIs

Product

SaaS dashboards, PDF generation, payments, authentication, analytics

Security

Vulnerability analysis, responsible reporting, OWASP review, access-control testing

STRENGTHS

Clean architecture

Responsive UI

Mobile release

Admin systems

Open source

Payment flows

Security analysis

EDUCATION

B.E. Computer Science & Engineering

RNS Institute of Technology, Bangalore

SELECTED PROJECTS

My Rental Find

Next.js · Stripe · AI · SaaS

Property-management SaaS for modern managers with tenant workflows, maintenance tracking, leasing, payments, operational dashboards, and AI-assisted insights.

BillExpert

Flutter · Hive · PDF · AdMob

Professional invoice and billing app with multi-currency support, client records, PDF templates, local-first storage, and a polished mobile workflow.

IQRA Library Registration App

Flutter · Supabase · QR

Mobile and dashboard system for library access, student management, QR scan entry/exit, role-based operations, and real-time data sync.

Library Dashboard

React · TypeScript · Supabase

Admin dashboard for private library operations with analytics, authentication, access controls, member records, and activity monitoring.

Flutter Welcome Kit

Flutter package · UI/UX

Published onboarding and guided-tour package with spotlight overlays, tooltips, customization options, accessibility focus, and reusable Flutter APIs.

Islamic Kit, Tafaseer, Iqbal Apps

Flutter · Firebase · AI APIs

Suite of mobile learning apps covering prayer times, Qibla, Hijri calendar, tafseer sources, offline reading, poetry analysis, and bilingual AI insights.

EXPERIENCE FOCUS

Independent Full-Stack & Mobile Developer

Product design, implementation, launch, and maintenance

- Built cross-platform Flutter apps and modern web dashboards from product requirements to usable releases.
- Integrated authentication, database workflows, local storage, PDF generation, payment flows, and admin tooling.
- Created reusable package APIs and open-source projects for Flutter developers.
- Improved portfolio presentation with a black/white theme, refreshed project visuals, and updated project positioning.

Cybersecurity Analyst & Open-Source Security Research

Vulnerability discovery, practical web security review, and responsible reporting

- Identified security issues across public and open-source projects, including quran.com, quranreflect.com, and seekersguidance.org.
- Reviewed authentication, authorization, exposed workflows, data handling, and user-facing web surfaces for practical risk.
- Combined development knowledge with security analysis to find issues that affect real product behavior and user trust.
